# Display of block message at startup of Windows 11 after installation of GL28-APS software, etc.

Overview

On Windows PCs with GL28-APS, GL100_240_840-APS, and GL980_2000-APS (hereafter referred to as APS) installed, a read block message may appear in Windows 11 version 24H2 or later.

*Since the target dll file is not used by APS, the operation is not affected.

"nimdnsNSP.dll" is a file associated with National Instruments Software and the message may appear due to Windows updates.

*National Instruments Software is the execution environment software for APS.

What to do if a message appears (as of March 2025)

Please check the "Don't show this message again" checkbox to close the message and continue using APS.

*Since the target dll file is not used by APS, the operation is not affected.
